Subject: Application for Python Developer Position

Dear Hiring Manager,

I hold a degree in Bachelor of Commerce in Computer Applications and have hands-on experience in Python, Django, MySQL, and front-end technologies like HTML, CSS, JavaScript, and Bootstrap. My background also includes working as a Trust & Safety Associate at Accenture from 2022 to 2024, where I developed strong communication, analysis, and problem-solving skills.

I've built multiple projects using Django, including:

- A **Personal Portfolio Website** showcasing user authentication, project listings, and contact form integration.
- A **Blog Application** with user login, CRUD features, pagination, and search functionalities.
- A **Digital E-Gram Panchayat Application** supporting role-based services, staff dashboards, and real-time status tracking.

These projects reflect my ability to build full-stack web applications with clean, modular code, and solid database integration.

I believe I meet all the mandatory requirements, including technical skills, project experience, and communication capabilities. My experience and continuous learning mindset make me a strong candidate for this position.

Thank you for your time and consideration. I look forward to your response.

Best Regards,
Shaik Jasmine.
